

Coho US Large Cap Equity Fund

Supplement to the Prospectus dated 16 February 2016 for Skyline Umbrella Fund ICAV

This Supplement contains specific information in relation to the Coho US Large Cap Equity Fund (the **Fund**), a sub-fund of Skyline Umbrella Fund ICAV (the **ICAV**) an umbrella type Irish collective asset-management vehicle with segregated liability between sub-funds governed by the laws of Ireland and authorised by the Central Bank.

This Supplement forms part of and should be read in conjunction with the Prospectus dated 16 February 2016 (the Prospectus).

The Directors of the ICAV, whose names appear in the **Directors of the ICAV** section of the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Dated: **16 February 2016**

1. INVESTMENT OBJECTIVE

The investment objective is to achieve a return greater than the overall US equity market as defined by the S&P 500 index by investing in US large cap and midcap equities. The Fund has a focus on capital preservation relative to the overall US equity market in down markets while being close to fully invested in equities at all times.

The S&P 500 is an index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe. Companies included in the index are selected by the S&P Index Committee, a team of analysts and economists at Standard & Poor's. The S&P 500 is a market value weighted index - each stock's weight is proportionate to its market value.

2. INVESTMENT POLICIES

The Fund intends to invest at least 80% of its Net Asset Value in equity securities primarily common stock issued by companies which are either established in the U.S. or which derive significant revenue and/or profits from the U.S. The Fund may invest in large cap companies which are companies that have a market capitalisation in excess of \$10 billion. The Fund may also invest in midcap companies which are companies that have a market capitalisation between \$3 billion and \$10 billion. It is expected that the Fund will predominantly invest in large cap companies.

The Investment Manager may also invest up to 20% of its Net Asset Value in equity related securities in circumstances where direct exposure to certain securities is uneconomic, impractical or not possible. Equity related securities include the following or similar types of securities: securities of issuers directly or indirectly in the form of Global depository receipts (GDRs), American depository receipts (ADRs), International depository receipts (IDRs), and European depository receipts (EDR's).

For defensive purposes, the Fund may keep up to 20% of its Net Asset Value in cash or cash equivalent instruments such as short-term government obligations and fixed income government bonds with a minimum rating of Aa+ (Moody's, Fitch, S&P). The Investment Manager uses its discretion as to when to invest in these asset classes, based on conditions in equity markets and will do so with the aim of reducing the effects of the volatility of equity markets on the Fund's portfolio and preserving the capital of the Fund.

The Fund may invest substantially in deposits with credit institutions. An investment in the Fund is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to the holder of a bank deposit account. The value of Shares may go down or up and investors may not get back the amount invested.

Investment Strategy

The Investment Manager shall use a conservative, "bottom up" fundamental approach to select equities and equity related securities for the Fund's investment portfolio of companies that are expected to go down in value less than the overall US Equity market (as defined by the S&P 500 index) in times that equity markets decrease in value. The Investment Manager will begin with a screen of approximately 1,300 large cap and mid cap companies to identify those companies that reflect:

- stability – low variability in earnings, revenues, and financial strength;
- growth – absolute and relative growth in earnings, revenues and dividends;
- profitability – the ability to consistently generate revenue in excess of expense and to minimise capital investment;
- quality – balance sheet strength, management depth, integrity and the ability to skilfully execute strategic objectives; and
- Environmental, Social and Governance (ESG) – The Investment Manager will be advised by Candoris B.V. on the application of ESG criteria as set out in section 4.

Through a combination of quantitative and qualitative analysis, the Investment Manager further reduces

the larger cap universe to 250 companies, which it believes have stable and predictable growth in earnings, revenues, and dividends. The Investment Manager constructs and applies a dividend discount model to each of these 250 companies to identify companies with reasonable valuations. The Fund will generally be comprised of 20 to 35 equity securities chosen because:

- They meet the Investment Manager's earnings, and stability criteria, relative capital preservation or low down market capture criteria, dividend and cash flow growth;
- The Investment Manager has established comfort with the long term qualitative aspects of the investments;
- The Investment Manager has talked with relevant management, competitors, customers and suppliers of the companies and believes that the future prospects of the relevant company are promising;
- The Investment Manager's dividend discount model reflects valuations that are compelling based on the expected rate of return estimates of the securities in the portfolio; and
- The Investment Manager objectively identifies and monitors major operating metrics and financial metrics that it expects the companies to maintain or achieve at specific points of time.

The primary focus of the Investment Manager when compiling a portfolio for the Fund will be on risk control and going down in value less than the overall US Equity market (as defined by the S&P 500 index) in times that equity markets decrease in value, while capturing most of the upside performance. The Investment Manager will seek out two types of companies – Demand Defensive Companies and Economically Sensitive Companies. Demand Defensive Companies include consumer staple companies and health care companies and are companies that exhibit the following characteristics:

- They are largely impervious to economic downturns;
- Their earnings, dividends and cash flow are mostly predictable;
- They significantly outperform in down markets and compete in all but the strongest up markets.

Economically Sensitive Companies include capital goods, consumer discretionary, technology, financial and industrial material sectors. They exhibit the following characteristics:

- They provide stable growth with modest economic cyclicality; and
- They provide competitive upside performance in periods of strong economic expansion.

The Investment Manager allocates more capital to Demand Defensive Companies relative to the overall US Equity market as defined by the S&P 500 index which results in better relative capital preservation. Next to that the Investment Manager focuses on the higher quality, less cyclical companies within the economically sensitive industries which attributes to the lower down market capture and better capital preservation relative to the overall US Equity markets (as defined by the S&P 500 Index). The Investment Manager takes a mostly contrarian approach, which tends to inject additional downside protection.

3. INVESTMENT MANAGER

The ICAV has appointed Coho Partners, Ltd (the **Investment Manager**) whose registered office is 300 Berwyn Park, 801 Cassatt Road, Suite 100, Berwyn, PA 19312, United States of America, as investment manager to the Fund pursuant to an investment management agreement between the ICAV and the Investment Manager dated 16 February 2016 (the **Investment Management Agreement**). The Investment Manager is authorised and regulated by the Securities and Exchange Commission and its main activity is providing investment management services. As at 31 March 2015, it has \$2.2 billion assets under management.

The Investment Management Agreement provides that the appointment of the Investment Manager as investment manager will continue in force unless and until terminated by either party giving to the other 90 days' notice in writing although in certain circumstances the agreement may be terminated forthwith by notice in writing by either party to the other. Under this agreement, the Investment Manager shall

not be liable to the ICAV or any Shareholders or otherwise for any error of judgement or loss suffered by the ICAV or any such Shareholder in connection with the Investment Management Agreement unless such loss arises from the negligence, fraud, bad faith, wilful default or wilful misfeasance in the performance or non-performance by the Investment Manager or persons designated by it of its obligations or duties under the agreement or breach of contract on the part of the Investment Manager or any of its agents or delegates or their agents.

4. **ADVISORY AND MARKETING SUPPORT AGENT**

The ICAV has appointed Candoris B.V. (the **Advisory and Marketing Support Agent**) to provide advisory and marketing support services to the Fund. In addition to assisting with client/investor relations, the Advisory and Marketing Support Agent will provide advice to the ICAV and the Investment Manager regarding companies to exclude using ESG criteria.

Guidelines for the observation and exclusion of companies

The Fund shall not be invested in companies which themselves or through entities they control:

- (i) produce weapons that violate fundamental humanitarian principles through their normal use; or
- (ii) produce tobacco; or
- (iii) sell weapons or military materiel to states that are subject to investment restrictions on government bonds.

5. **BORROWINGS**

In accordance with the general provisions set out in the Prospectus, the Fund may borrow up to 10% of its net assets on a temporary basis.

6. **INVESTMENT RESTRICTIONS**

The general investment restrictions set out under the heading "**Investment Restrictions**" in the Prospectus apply to the Fund.

In addition to the general investment restrictions set out in the Prospectus, the Fund will not invest in the equities of any companies that do not conform to the ESG criteria and which are included on a list of restricted companies maintained by the Fund. The Fund shall not invest in those companies that have been included in the Norges Bank exclusion list (a list which applies the guidelines for the observation and exclusion of companies set out in section 4 above).

7. **RISK MANAGEMENT**

The Fund does not currently utilise financial derivative instruments (**FDI**). A risk management process will be submitted in respect of the Fund in accordance with the Central Bank's Guidance Note 3/03 prior to the Fund engaging in any FDI.

8. **RISK FACTORS**

The general risk factors set out under the heading **RISK FACTORS** section of the Prospectus apply to the Fund. These risk factors are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before making a subscription request for Shares. The investments of the Fund may be subject to market fluctuations, currency fluctuations, emerging markets risks, custody and settlement risks, registration risk and foreign exposure risk.

In addition, the following risk factors apply to the Fund:

8.1. **General Risk**

The net asset value of the Fund and investment return will fluctuate based upon changes in the value of its portfolio securities. The market value of a security may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price originally paid for it, or less than it was worth at an earlier time. Market risk may affect a single issuer, industry, sector of the economy or the market as a whole. U.S. and international markets have experienced, and may continue to experience, volatility, which may increase risks associated with an investment in the Fund. The market value of securities in which the Fund invests is based upon the market's perception of value and is not necessarily an objective measure of the securities' value. In some cases, for example, the stock prices of individual companies have been negatively affected even though there may be little or no apparent degradation in the financial condition or prospects of the issuers. Similarly, the debt markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, increased likelihood of default, and valuation difficulties. As a result of this significant volatility, many of the following risks associated with an investment in the Fund may be increased. Continuing market volatility may have adverse effects on the Fund.

8.2. **Objective Risk**

There can be no assurance that the Fund will achieve its investment objective. An investor should consider his personal tolerance for an investment based upon global equity securities before investing in the Fund.

8.3. **Management Risk**

The ability of the Fund to meet its investment objective is directly related to the Investment Manager's investment strategies for the Fund. The value of your investment in the Fund may vary with the effectiveness of the Investment Manager's research, analysis and asset allocation among portfolio securities. If the Investment Manager's investment strategies do not produce the expected results, the value of your investment could be diminished or even lost entirely and the Fund could underperform against other funds with similar investment objectives.

8.4. **Concentration Risk**

The Fund may have a relatively high percentage of assets in a single or small number of issuers and may have fewer holdings than other funds. As a result, a decline in the value of an investment in a single issuer could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diverse portfolio.

8.5. **Equities and Securities Risk**

As the Fund will invest primarily in equity securities, it may be more volatile than a fund that invests in fixed income securities, but may also offer greater potential for growth. The value of the Fund's underlying investments may fluctuate in response to activities and results of individual companies, as well as in connection with general market conditions.

There is a risk that the stock price of one or more companies comprised within the assets of the Fund will fall or will fail to rise.

8.6. **Large Cap Company Risk**

The Fund's investments in larger, more established companies are subject to the risk that larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion. Larger, more established companies may be unable to respond quickly to new competitive challenges, such as changes in consumer tastes or innovative smaller competitors, potentially resulting in lower markets for their common stock.

8.7. **Mid Cap Companies Risk**

The mid cap companies in which the Fund invests may not have the management experience, financial resources, product diversification and competitive strengths of large cap companies. Therefore, these securities may be more volatile and less liquid than the securities of larger, more established companies. Mid cap company stocks may also be bought and sold less often and in smaller amounts than larger company stocks. Because of this, if the Investment Manager wants to sell a large quantity of

a mid-cap company stock, it may have to sell at a lower price than it might prefer, or it may have to sell in smaller than desired quantities over a period of time. Analysts and other investors may follow these companies less actively and therefore information about these companies may not be as readily available as that for large-cap companies.

8.8. Foreign Investment Risk

As the Fund may invest in global equity securities, there is a risk of currency fluctuations, economic or financial insolvency, lack of timely or reliable financial information, possible imposition of foreign withholding taxes or unfavourable political, economic or legal developments.

8.9. Foreign Exchange Risk

Changes in rates of exchange may have an adverse effect on the Net Asset Value of the Fund. In addition a change in foreign currency exchange rates may adversely affect cash flows or income from the Fund's US Dollar denominated investments. Foreign exchange investment strategies that may be employed to manage such risks might not be successful.

8.10. ADR Risk

ADRs are generally subject to the same risks as the foreign securities because their values depend on the performance of the underlying foreign securities. ADRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository, whereas a depository may establish an unsponsored facility without participation by the issuer of the depository security. Holders of unsponsored ADRs generally bear all the costs of such ADRs, and the issuers of unsponsored ADRs frequently are under no obligation to distribute shareholder communications received from the company that issues the underlying foreign securities or to pass through voting rights to the holders of the ADRs. As a result, there may not be a correlation between such information and the market values of unsponsored ADRs.

8.11. Conflict of Interest Risk

The ICAV will rely on the Investment Manager in implementing its investment strategies. The Directors have determined the investment policies of the Fund as set out herein and the Investment Manager will monitor the performance of such investments on an on-going basis. Investors must rely on the judgement of the Directors in determining to invest in the manner set out herein. The Investment Manager and its principals and affiliates will devote a portion of their business time to the ICAV's business. In addition, where valuations are provided by the Investment Manager there is a possible conflict of interest where their fees are based on or affected by the Net Asset Value of the Fund. Any conflicts of interest will be resolved fairly.

8.12. Default of Service Provider

The Fund relies on services provided by a number of third parties. The bankruptcy or liquidation of any such third parties, including the Investment Manager, the Administrator or the Depository may have an adverse impact on the performance of the Fund and its Net Asset Value.

8.13. Limited Disposal Rights Risk

There will be no secondary market for Shares of the Fund and transfers of Shares are only permitted to those persons who satisfy the criteria for permitted shareholders. Consequently, investors may be able to dispose of their Shares only by requesting the Fund to repurchase their Shares on a Dealing Day.

8.14. Taxation Risk

A risk exists that the tax authorities in countries in which the Fund invests may, where relevant, not be prepared to permit persons in their jurisdictions to pay interest to the Fund (or its subsidiary if any is used) without the imposition of withholding tax in that foreign jurisdiction. Any such withholding tax will impinge upon the return payable by the Fund to investors.

8.15. Valuations of Net Asset Value Risk

The valuation of the Fund's assets obtained for the purpose of calculating Net Asset Value may not be reflected in the prices at which such assets are sold. For details of the valuation of assets, please see the section in the Prospectus headed "**Valuation of Assets**".

8.16. Lack of Operating History Risk

The Fund has limited operating history. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Directors may determine to liquidate the Fund. Liquidation of the Fund can be initiated by the Directors if it determines it is in the best interest of shareholders. The timing of any Fund liquidation may not be favourable to certain individual shareholders.

9. DIVIDEND POLICY

Under the Instrument, the Directors have the discretion to decide whether or not any distribution will be made from the income or capital gains of the ICAV in relation to any financial year and (if so) the amount to be distributed. It is not the present intention of the Directors to declare distributions.

10. PROFILE OF A TYPICAL INVESTOR

The Fund is designed for retail and institutional investors seeking pooled exposure to the equity market, and who are comfortable with a higher level of investment risk. It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash. Share prices will fluctuate and may fall in value. It is important to understand that the Fund should be viewed as a medium to long term investment.

11. KEY INFORMATION FOR BUYING AND SELLING

Base Currency

The Base Currency of the Fund is US Dollar.

Shares available for subscription

Shares of the Fund are currently available for subscription in the following denominations:

- | | | |
|----|-----------|---------------|
| 1. | US Dollar | Institutional |
| 2. | US Dollar | Retail A |
| 3. | US Dollar | Retail B |
| 4. | Euro | Retail |

Minimum Investment Levels

Minimum initial investment amount

US Dollar Institutional Class: \$250,000 or equivalent in another acceptable currency

US Dollar Retail A Class: \$500 or equivalent in another acceptable currency

US Dollar Retail B Class: \$1,000 or equivalent in another acceptable

currency

Euro Retail Class: €1000 or equivalent in another acceptable currency

Minimum additional investment amount

US Dollar Institutional Class: \$100 or equivalent in another acceptable currency

US Dollar Retail A Class: \$100 or equivalent in another acceptable currency

US Dollar Retail B Class: \$100 or equivalent in another acceptable currency

Euro Retail Class: €100 or equivalent in another acceptable currency

The Directors may waive such minimum investment levels in their absolute discretion. The Fund will begin acquiring assets once it has received €30 million.

Minimum Fund Size

If the Fund's assets fall below €20 million, the Directors may, at their absolute discretion, resolve to terminate the Fund.

Initial Offer Period

The continuing Initial Offer Period for US Dollar Retail A Class and US Dollar Retail B Class shall continue until 5.00 pm (Irish time) on 15 July 2016 and shall be at the Initial Issue Price, as set out below. The Initial Offer Period of each class of Shares may be extended or shortened as the Directors may determine in accordance with the requirements of the Central Bank. After the Initial Offer Period of each class, such class will be available for subscription at the Net Asset Value per Share.

All other Classes have launched and will be issued at the Net Asset Value per Share.

Initial Issue Price

1. US Dollar Retail A Class USD 100
2. US Dollar Retail B Class USD 100

Business Day

Any day (except Saturday or Sunday) on which the banks in Ireland are open generally for business, or such other day as the Directors may, with the consent of the Depositary, determine and notify to Shareholders in advance.

Dealing Day

The Fund shall be open to dealing on every Business Day.

Dealing Deadline

In respect of a Dealing Day, the Dealing Deadline for Subscriptions and Redemptions is defined as 3 pm (Irish time) on the relevant Dealing Day or such other day or time as the Directors may determine provided it is prior to the relevant Valuation Point.

Settlement Date

Subscription monies must be received by and generally payment for Shares redeemed will be effected by the 3rd Business Day falling after the Dealing Day on which the redemption request was received. However, the ICAV may, at its absolute discretion, refuse to satisfy a redemption request or make any other payment to a Shareholder or at the direction of a Shareholder if such payment would result in a breach of the guidelines in operation from time to time in relation to the detection and prevention of money laundering. Redemption proceeds will be paid in the currency of the relevant Share class.

Valuation Point

The Valuation Point shall be the close of business of the relevant market on the Dealing Day and in any event shall be after the Dealing Deadline.

12. FEES AND EXPENSES

The fees for the Fund are currently as set out below. The fees of the Investment Manager, Advisory and Marketing Support Agent, the Administrator, the Depositary, the Distributor, the relevant portion of the Director's fees, administrative expenses of the Fund, the regulatory levy of the Fund, ESG advisory expenses, registration costs and other administrative expenses shall be taken out of the TER below. The Management Fee covers the fees for the Investment Manager, Advisory and Marketing Support Agent. The other fees as listed above will be paid out of the Fixed Service fee. In circumstances where the Fixed Service Fees accrued to the Fund are in excess of the Fixed Service Fee as set out below, the excess fees and costs shall be paid out of the Management Fee and the Management Fee shall be reduced accordingly prior to payment.

	US Dollar Institutional Share Class	Us Dollar Retail A Class	US Dollar Retail B Class	Euro Retail Class
Management Fee	.64% of the Net Asset Value	1.50% of the Net Asset Value	1.25% of the Net Asset Value	1.50% of the Net Asset Value
Fixed Service Fee	.15% of the Net Asset Value	.25% of the Net Asset Value	.25% of the Net Asset Value	.25% of the Net Asset Value
TER	.79% of the Net Asset Value	1.75% of the Net Asset Value	1.50% of the Net Asset Value	1.75% of the Net Asset Value

Establishment Costs and Expenses

The Fund's formation expenses were approximately €12,500 and are being borne out of the assets of the Fund, being amortised over the first five accounting periods of the Sub-Fund.

This section should be read in conjunction with the section entitled Fees and Expenses in the Prospectus.
