ARGA Emerging Market Equity Fund: Class A USD\$ Shares Skyline Umbrella Fund ICAV (the "ICAV")

ISIN: IE00BP41KZ81

Objectives and Investment Policy

The Fund's goal is to maximise clients' wealth over time by generating superior long-term returns. The Fund aims to achieve this goal by investing primarily in equity and equity-linked securities in emerging markets. The Fund may also invest in equity and equity-linked securities in developed markets where the underlying corporate revenue, earnings, assets, costs or employees are predominantly from or in emerging markets. The Fund may invest in non-US issuers through depositary receipts and participatory notes. The Fund may also invest in stocks purchased in underwritten initial public offerings of equity securities. The Investment Manager generally seeks diversification rather than concentration by industry, country or currency when valuation spreads are narrow. However, the Fund may have significant

concentration in particular industries from time to time (up to 35% of NAV of the Fund). The Fund may invest in pooled real estate investment vehicles such as real estate investment trusts. For short-term cash management, the Fund may invest in cash and/or investment grade money market instruments with maturities up to one year. Class A USD\$ Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class. Shares in the fund can be bought and sold on any business day in Ireland. Recommendation: this Fund may not be appropriate for short term investment. Please refer to the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'. With a category 7 fund, the risk of losing your money is higher but there is also a chance of making higher gains.
- The Fund is in category 6 because of the high range and frequency of price movements of the underlying investments

The indicator does not take account of the following risks of investing in the Fund:

Although the Fund will strive to reduce counterparty credit risk, there is no assurance that a counterparty will not default or that the Fund will not sustain losses as a result.

The Fund may at times invest in securities that are inherently less liquid and more difficult to sell. The Fund may be exposed to the creditworthiness and performance of one or more counterparties. The Fund invests in equities globally and is, therefore, exposed to fluctuations in currency exchange rates as well as unstable currencies in certain developed and emerging markets. The performance results of participatory notes may not replicate exactly the performance of the issuers that the notes seek to replicate due to transaction costs and other expenses. Investing in emerging markets involves a greater degree of risk than investments in more developed countries. The Fund's success may be affected by general economic and market conditions that could adversely impact the Fund's profitability or result in losses. For a full list of possible risk factors please see section entitled "Risk Factors" set on in the Prospectus and Fund Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
