WHAT IS THIS PRODUCT?

TYPE:	This Product is an Alternative Investment Fund
OBJECTIVES:	The investment objective of the Initiative Financial Senior Credit Property Sub-Fund I is issuing loans; participating in loans; investment in debt/credit instruments; participations in lending; and to operations relating thereto, including investing in equity securities of entities or groups to which the Fund lends or instruments which are held for treasury, cash management or hedging purposes. The Fund will seek to achieve its investment objective primarily by financing syndicated senior secured property loans on which it will have pre-emptive rights to finance up to 75% of each secured property loan extended to each borrower, subject to a defined secured lending mandate agreed between the Investment Manager and the Loan Facility Agent and final approval by the Investment Manager on a loan by loan basis. Loan principal repaid may be redeployed over the lifecycle of the Fund or relevant loan, to compound returns. The Fund aims to secure optimised returns on highly collateralised property loans. By providing loan terms of less than three years, the Fund aims to maintain a relatively short-term exposure to the market at any given time.
INTENDED RETAIL INVESTOR:	The Product is targeted at MiFID Professional Clients and Irish Qualifying Investors. The investor's objective for this investment should be aligned with that of the Product as outlined above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

← Higher risk
Lower risk →

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The underlying funds may include illiquid assets such as alternative funds, real estate funds and/or non-quoted assets. These assets incur additional risks which are not considered in the indicator shown above when they do not represent a significant part of the underlying funds. These risks are that these assets could not be sold or not sold at the desired time and / or lead to significant losses. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the risk classes of the underlying investment strategies as ranging from 3 out of 7, which is a medium-low risk class.

Please note the Sub-Fund is subject to market fluctuations. There is no assurance that any appreciation in the value of investments will occur or that the investment objective of this Sub-Fund will be achieved. The value of investments and the income derived therefrom may fall as well as rise and investors may not recoup the original amount invested. Past performance is not a reliable guide to future performance. If you invest in this fund you may lose some or all of the money you invest.

This product does not include any protection from future market performance so you could lose some or all of your investment.

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest 10000 EUR.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

WHAT HAPPENS IF DAVY ASSET MANAGEMENT IS UNABLE TO PAY OUT?

You may face a financial loss should the Manufacturer or depositary, Northern Trust Fiduciary Services (Ireland) Limited, default on their obligations. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled. Further details are available from the Manufacturer.

WHAT ARE THE COSTS?

COSTS OVER TIME

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 EUR. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
