### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The Fund's risk category shown is not guaranteed and may change in the future for various reasons including general market developments and changes such as geo-political factors.
- The lowest category does not mean 'risk free'.

The risk and reward category shown is not a target or guaranteed and may shift over time. A category 1 is not a risk free investment. This indicator is not a measure of the risk of you losing the amount you have invested. The Fund is not guaranteed and your investment is at risk.

This Fund is in category 4 (denoting medium risk, but with the potential for medium rewards) because of the higher range and frequency of price movements of the underlying investments made. Any investment in any Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund may use total return swaps for investment purposes to gain targeted economic exposure to the equity Indices and to control counterparty credit exposures. Up to 100% of the NAV of the Fund may be invested in total return swaps. The approved counterparty may provide collateral to the Fund, including cash, Gilts, US treasury

bills and other high-quality government bonds with a maturity of up to 7 years.

The Fund may construct simple hedging strategies using listed FDIs such as vanilla put options/put spread options/vanilla call options and call spread options. The level of leverage (calculated as a sum of the notional exposure of FDI being utilised by the Fund) will typically be in the range of 150% - 250% and is not expected to exceed 300% of the Net Asset Value of the Fund in most market conditions, although higher levels are possible.

The indicator above does not take account of the following risks of investing in the Fund.

**Credit Risk** – A borrower or counterparty may fail to repay or otherwise fail to meet contractual obligations to the Fund.

**Liquidity Risk** - under unusual market circumstances certain assets in which the Fund invests may be subject to liquidity constraints.

**Investment Risk** – The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.
