Some of the information has been obtained from published sources or has been prepared by third parties

The Example scenarios make the following assumptions:

- (1) There is only one trade made during the period and that is a purchase of an Irish listed share (Scenario A) or a European listed Exchange traded Fund (Scenario B)
- (2) No changes are made in the following year so costs reflect a single holding in your portfolio.

Performance can't be guaranteed and this information is not intended to imply a particular level of return, instead it is provided by way of an example as to how the charges will affect what you might get back. The illustration shows you the effect charges have when comparing the return before and after fees.

Warning: Forecasts and estimates are not a reliable guide to the future performance of any investment. The value of investments may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
