Davy Group continues London expansion with key research appointment

Davy Group, a leading provider of stockbroking, financial advisory and asset and wealth management services, has continued the expansion of its UK operations with the appointment of Dave Greenall, one of the City's leading business services analysts, in London. This follows the appointment of three senior Capital Markets bankers to Davy Group's UK team over recent months.

The creation of a specialist business services research team will add another key sector to its research offering.

Dave has 30 years' experience running top ranked business services teams at Merrill Lynch, CSFB, Dresdner Kleinwort and RBC and most recently ran an independent, sector focused research consultancy for both institutional and corporate clients. His coverage will span B2B service providers, distributors, outsourcers, staffers and language services.

Headquartered in Dublin with operations across the Republic of Ireland, Northern Ireland, London, Luxembourg and the U.S., Davy Group is already the leading intermediary for Irish businesses seeking to access the UK market. It has been steadily building its UK-focused business and plans to accelerate this process in 2021 as part of its continued group-wide expansion plans.

Commenting on the appointment; Damian Roddy, Head of Institutional Group said:

"Dave's appointment will significantly enhance our research coverage and his reputation in business services provides an excellent platform from which to take our offering into new areas. We believe 2021 presents an exciting opportunity for Davy Group to grow its high-quality offering in the UK market and we're encouraged by the positive start to the year that we have made."

Dave Greenall added:

"I'm delighted to be joining Davy Group at such an important time for the business. Davy Group is an excellent franchise and has a great platform to continue to build its presence in the crowded UK market given its clearly differentiated approach and ethos".
