### WHAT IS THIS PRODUCT?

TYPE:	This Product is an Alternative Investment Fund
OBJECTIVES:	The investment objective of the Davy Irish Equity Fund is to adopt an active approach to trading within the Irish equity market using both direct investment in Irish shares and contracts for differences ("CFDs") to achieve medium to long term capital appreciation for investors. The investment objective will be achieved by investing in the full range of Irish shares both listed and traded on the Irish Stock Exchange or on a Recognised Exchange concentrating primarily on the larger capitalisation issues of shares given their greater liquidity. The Investment Manager will adopt an active approach to trading within the Irish equity market using both direct investment in Irish shares, CFDs derivatives, including OTC derivatives listed warrants, American Depository Receipts and Global Depository Receipts to achieve capital appreciation for investors.
INTENDED RETAIL INVESTOR:	The Davy Irish Equity Fund is targeted at Eligible Counterparties, Professional Clients and Retails Clients, with a minimum investment of €1,000. The investor's objective for this investment should be aligned with that of the Product as outlined above.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

#### RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the risk classes of the underlying investment strategies as ranging from 4 out of 7, which is a medium risk class.

Please note the Sub-Fund is subject to market fluctuations. There is no assurance that any appreciation in the value of investments will occur or that the investment objective of this Sub-Fund will be achieved. The SRI classification is based on the Sub-Fund's liquidity profile & diversification.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The underlying funds may include illiquid assets such as alternative funds, real estate funds and/or non-quoted assets. These assets incur additional risks which are not considered in the indicator shown above when they do not represent a significant part of the underlying funds. These risks are that these assets could not be sold or not sold at the desired time and / or lead to significant losses. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

This product does not include any protection from future market performance so you could lose some or all of your investment.

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest 10000 EUR.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

## WHAT HAPPENS IF J&E DAVY IS UNABLE TO PAY OUT?

You may face a financial loss should the Manufacturer or depositary, Northern Trust Fiduciary Services (Ireland) Limited, default on their obligations.. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled. Further details are available from the Manufacturer.

## WHAT ARE THE COSTS?

### COSTS OVER TIME

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 EUR. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
